Art Unit: 3728

1. Restriction to one of the following inventions is required under 35

U.S.C. 121:

- I. Claims 1 and 3-6, drawn to a storage case for disc-type media or compact disc, and such a case in combination with a pickup device, classified in class 206, subclass 232 or 308.1.
- II. Claim 2, drawn to a disc pick-up device, classified in class 294, subclass 99.2 (tweezers and tongs).

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I (claim 1) and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination in claim 1 does not require neither notch means nor ears, which is required by the subcombination claim 2. The subcombination has separate utility such as picking up a disc that is not a disc media, or picking up a disc media from a case without a platform, or picking up a disc from a platform which does not have a hole.

3. Inventions I (claims 3-6) and II are also related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I is separately usable because the storage case of claims 3-6 are capable of storing a media disc whereby the disc can be

retrieved by hand, without a pick-up device. The invention II is separably usable since the pick-up device of claim 2 can be used to pick-up annular disks which are not media disks or to pick-up media discs not from a case but from a surface or to pick-up media discs from a case which does not include a front wall recess, a thumb lift, indicia on the inside surface of the base, or holding/projection means on the inside of the cover. See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jimmy G Foster whose telephone number is (571) 272-4554. The examiner can normally be reached on Mon-Fri, 8:45 am - 5:15 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mickey Yu can be reached on (571) 272-4562. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

## **NEW CENTRAL FAX NUMBER**

Effective July 15, 2005

On July 15, 2005, the Central FAX Number will change to **571-273-8300**. This new Central FAX Number is the result of relocating the Central FAX server to the Office's Alexandria, Virginia campus.

Most facsimile-transmitted patent application related correspondence is required to be sent to the Central FAX Number. To give customers time to adjust to the new Central FAX Number, faxes sent to the old number (703-872-9306) will be routed to the new number until September 15, 2005.

After September 15, 2005, the old number will no longer be in service and **571-273-8300** will be the only facsimile number recognized for "centralized delivery".

**CENTRALIZED DELIVERY POLICY:** For patent related correspondence, hand carry deliveries must be made to the Customer Service Window (now located at the Randolph Building, 401 Dulany Street, Alexandria, VA 22314), and facsimile transmissions must be sent to the Central FAX number, unless an exception applies. For example, if the examiner has rejected claims in a regular U.S. patent application, and the reply to the examiner's Office action is desired to be transmitted by facsimile rather than mailed, the reply must be sent to the Central FAX Number.
